

A b s t r a c t

The invention relates to a structural element (1), particularly a hybrid structural element, for a cross member of a vehicle, in which a base body (2) is provided, which is at least partially lined with plastic (4) and which is provided with at least one flow tap (8a to 8e). Said base body (2) is, in the area of the flow tap (8a to 8e), provided with a flow-guiding means (9).
